

BOOKING A SERVER

Bookings are done in the official ozfortress Discord. Simply join the [#bookings](#) channel and say “/booking create”, and the bot will step you through above the chat area as to what parameters are required. Upon filling out the command with everything needed, the server will be sent to your Discord user via DMs. For a full list of commands, please refer to [Qixalite's booking docs](#), but you can find a basic list of commands below:

[Click here to join #bookings!](#)

Commands

```
/booking create
```

Book a server, follow the prompts the bot provides in the field above the chat.

```
/booking status
```

List the status of all servers.

```
/booking rcon
```

Send RCON commands via the bot, allowing control of the server without using the in-game console.

```
/booking server-logs
```

List and download match log files from an active server booking.

```
/booking server-demos
```

List and download demo files from an active server booking.

Bot related commands can be sent in the [#bookings](#) channel.

Additional Information

If logs.tf is experiencing downtime, please be sure to download the server logs using the command via Reginald (or via Qixalite's Hive Control Panel) and post a link to the download in match communications. A screenshot of the scoreboard will not suffice. If you have questions regarding this, feel free to contact an ozfortress League Administrator.

Find all additional information you need for running your bookable in [Qixalite's booking docs](#).

Thank you to Qixalite for providing bookable solutions for ozfortress.
